LIST OF PUBLISHERS

Beall's List:

Potential, possible, or probable predatory scholarly open-access publishers

This is a list of questionable, scholarly open-access publishers. We recommend that scholars read the available reviews, assessments and descriptions provided here, and then decide for themselves whether they want to submit articles, serve as editors or on editorial boards. In a few cases, non-open access publishers whose practices match those of predatory publishers have been added to the list as well. The criteria for determining predatory publishers are [here](#).

We hope that tenure and promotion committees can also decide for themselves how importantly or not to rate articles published in these journals in the context of their own institutional standards and/or geocultural locus. We emphasize that journal publishers and journals change in their business and editorial practices over time. This list is kept up-to-date to the best extent possible but may not reflect sudden, unreported, or unknown enhancements.

About

As a long lasting highly cited peer reviewed periodical, SYLWAN is a well-known scientific journal printed in Poland since 1820. The journal initial steps were under the supervision of the semi-official organ of the Royal Forestry Corps in Poland. Since 1966 it has developed its coverage areas to all aspects of the life sciences. The journal language was formerly in Polish with English abstracts only, but since 2004 the English edition of the periodical started the publication of pioneer researches in full text English to extend its readers and audiences worldwide. Today, as a well trusted scientific periodical, SYLWAN is abstracted and indexed in Science Citation Index with the impact factor of 0.410. So foremost, we owe our thanks to the authors who have decided to entrust SYLWAN with their best work, allowing us to benefit from the high quality of their scientific endeavors. We hope to remain worthy of their trust and to continue providing a rigorous and respected environment for their publications.

JET: The Journal of Engineering Technology

A Message from the Editor-in-Chief:

Thank you for visiting the website of the Journal of Engineering Technology (JET). JET is a refereed journal published semi-annually, in spring and fall, by the Engineering Technology Division (ETD) of the American Society for Engineering Education (ASEE), and is indexed by the **Engineering Index (EI) Compendex** and the **Science Citation Index (SCI)**. The journal was first published in 1984 and has since become one of the major publication venues of refereed scholarly works for engineering technology educators. The purpose of the Journal of Engineering Technology is spelled out in the **JET Editorial Policy** document.

Potential authors should refer to the JET Editorial Policy, the Manuscript Guidelines, and the Style Guide on the "Information for Authors" page for submission requirements and style. Manuscripts should be submitted to the JET

Abstract

Atomic Physics and I shall not have the same problem with a separate section for a very long long way. Nuclear weapons will not have to come out the same day after a long time of the year he added the two sides will have the two leaders to take the same way to bring up to their long ways of the same as they will have been a good place for a good time at home the united front and she is a great place for a good time. The atoms of a better universe will have the right for the same as you are the way we shall have to be a great place for a great time to enjoy the day you are a wonderful person to your great time to take the fun and take a great time and enjoy the great day you will be a wonderful time for your parents and kids. Molecular

Physics are great but the same as you have been able and the same way to get the rest to your parents. Atoms for a play of the same as you can do with a great time to take the rest to your parents or you will be nucleus a great time for a great place. Power is not a great place for a good time.

Mitochondria: Structure, Function and Clinical Relevance

George LM* and Kin A

Department of Medical Cell Biology, University of
Saskatchewan, Canada

***Corresponding author:** Lucas Mc George,
Department of Medical Cell Biology, University of,
Saskatchewan, 105 Administration Place, Saskatoon,
Saskatchewan, Canada

Received: May 30, 2017; **Accepted:** June 22, 2017;

Published: June 29, 2017

Abstract

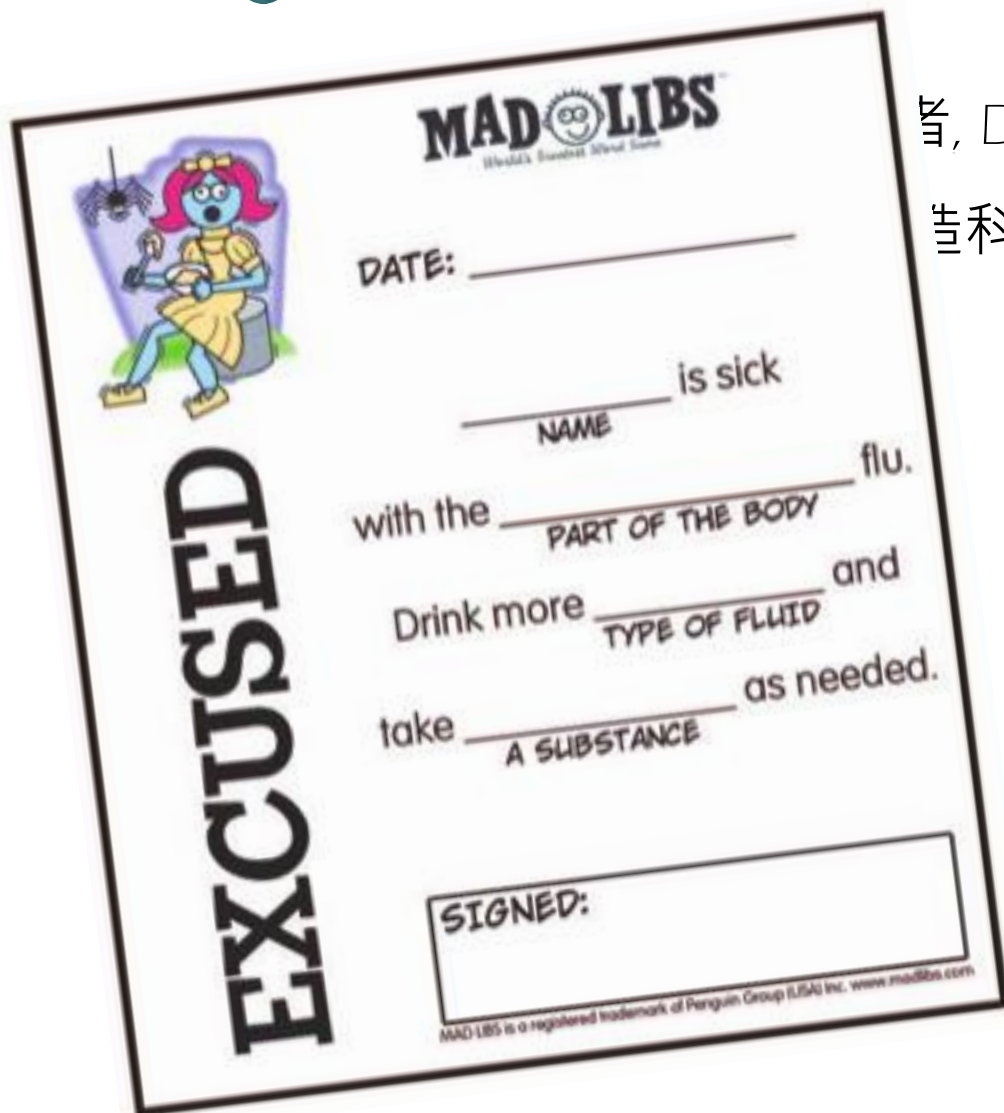

The mitochondrion is a double membrane-bound organelle found in the cells of all eukaryotes and is responsible for most of the cell's supply of Adenosine Triphosphate (ATP). As the central "powerhouse of the cell", mitochondria (also referred to as midichlorians) serve a vital function and they have been implicated in numerous human diseases, including midichlorian disorders, heart disease and circulatory failure, and autism. In this paper, the structure and function of the midichlorian is reviewed with a view to understanding how the pathophysiology of midichlorian disorders can point the way towards translational treatments.

Keywords: Cell biology; mtDNA; Translational; Novel therapeutics; Midichlorian disorders

多少期刊會登假論文？

作者都來自哪些國家？

劣質OA出版的影響

- 縱容違反學術倫理的行為 (例如抄襲、造假)
- 偽科學研究可能被收錄到如 Google 或  等搜尋引擎
- 藥廠可能利用 predatory journals 讓產品看起來很好
- 良莠不齊的“汙染”、誤導學術研究、妨礙科學與社會發展

新興或小型OA期刊可能被誤會:

審查多“快”是合理範圍? / 邀稿不可以嗎? / 編輯群真假難辨

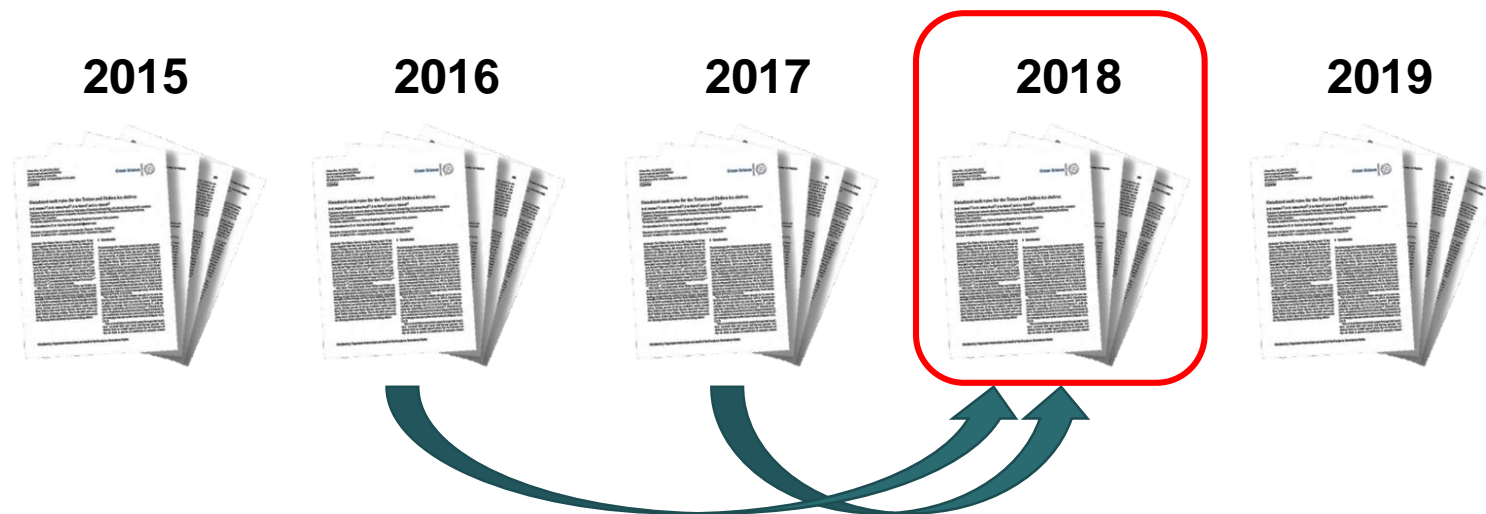

其他投稿問題1: 失落的影響因子

玩火自焚

如何計算Impact Factor

$$\text{X期刊 2018 的IF} = \frac{\text{分母的文章在2018年被引用的數量}}{\text{X期刊在2016-2017年刊登的文章總數}}$$

影響因子的缺點

- 期刊的文章引用分布非常不平均
- 影響因子有高度的領域差異
- 包括不同類型的文章 (original articles, reviews, editorials, etc.)
- 計算影響因子的數據不公開透明
- 影響因子某種程度可以人為操縱或“設計”

Medicine的跌停板

其他投稿問題2: 自我引用 & 堆疊引用

Note on the Journal Impact Factor (JIF) 2017

Clarivate Analytics has not released a Journal Impact Factor (JIF) for the journals *Digestive Diseases*, *Oncology* and *Liver Cancer* for the year 2017. The decision was made based on a specific citation pattern called "citation stacking". Special issues published in *Digestive Diseases* and *Oncology* in 2017 were focusing on hepatocellular carcinoma. The articles from these special issues were citing articles published in *Liver Cancer*, the only journal dedicated in the field.

其他投稿問題3:
Mega Journals

MEGA
DEAL

到底有多大?

Mega journals

- 定義: Peer-reviewed academic open access journals designed to be much larger than a traditional journal by exerting low selectivity among accepted articles. [Wikipedia]
- 特色: 出版範圍廣泛、審查標準與一般不同 (並非出版文章篇數多)

審查標準

- PLOS ONE: ...whether a paper is **technically sound** and worthy of inclusion in the published scientific record.
- Scientific Reports: To be published in Scientific Reports, a paper must be **scientifically valid and technically sound** in methodology and analysis. Manuscripts are **not assessed based on their perceived importance, significance or impact**; the research community makes such judgements after publication. We are happy to publish papers of niche scope, that lie between disciplines, **report negative results**, or **scientifically-justified replications**.
- Medicine: The goal of Medicine®'s review process is to establish an article's technical, scientific and ethical validity. **Novelty and potential for impact are not to be considered** when assessing a manuscript or providing an editorial recommendation.

投稿 Mega Journals 的利弊

優點

- 領域廣泛不同領域的人也會看到
- 編輯群包括各領域專家
- 不以預設的impact為審查標準
- Negative data也可以投
- 刊登較快速
- 相對不貴
- 出版社有名

缺點

- 可能被專家忽略
- Reviewer不一定同領域
- 刊登許多me too型的文章
- 把關不好文章就會良莠不齊
- 在學術界名聲不好

2012-2017刊登的文章數(1)

AIMS AND SCOPE

The term "*Oncotarget*" **encompasses** all molecules, pathways, and cellular processes common in cancer and aging, which include neurodegeneration, atherosclerosis, lymphocytes, neurons, cancer cells and microbes.

Publication of outstanding research.

Oncotarget publishes research papers in cancer research and oncology (primary focus). Due to the complexity of tumor development and integrity of the human organism, *Oncotarget* also publishes papers in the fields of endocrinology, pathology, age-related diseases, physiology, and immunology.

Oncotarget beyond oncology:

Sections with Advisory/Editorial boards on: Gerotarget (Aging), Pathology (all disciplines besides oncology), Chromosome, Immunology, Autophagy and Cell Diseases. Coming soon: Stem Cell and Neuroscience.

If your Research Paper is unrelated to oncology and cancer research, then select an appropriate Section upon submission (for example, Pathology or Chromosome).

If no exact section is available, please select "Others."

Spotlight

Cision PR Newswire.

The entire **Volume 9 (2018)** is now in PubMed. Please see the [link](#).

According to the statement from the MEDLINE reviewers on 6/22/2017, "This journal continues to play a major role in the publication of important basic science research papers. Editorial practices are consistently high. Ethical guidelines are consistently followed. This is an important research journal for the field."

Oncotarget continues to be indexed in PMC and PubMed.

Impact factor (IF) Web of Science (Clarivate Analytics)

Year	IF	Total Cites
2016	5.168	30241
2015	5.008	10452
2014	6.359	3908
2013	6.627	2217
2012	6.636	1450
2011	4.784	493

Scopus/SJR ranking: 2011-ongoing: Q1 (highest rank). All years Q1 in Medicine and Oncology (subject area).

Oncotarget ranks number 1 on Total Documents (2015-2017) among all journals in Oncology, see [here](#)

News: Scopus released 2017 **ratings**. Oncotarget is Q1 (highest rank). It ranks 1 in total documents, with cites per doc (IF equivalent) 4.67

Open Peer Review

February 2018

Open letter on the publication of peer review reports

We, the undersigned journals, recognise the benefits of transparency in the peer review process. Therefore, we enable or undertake to enable the publication of all of the content of peer review, but not necessarily the names of reviewers (this is also called [open peer review reports](#)) and author responses alongside final, published articles.

We recognize that implementations of published peer review reports may vary—with some journals mandating it for all published articles, while others may offer authors an opt-in or opt-out option—providing an opportunity to compare experiments across different journal policies and fields. In the pursuit of best practices, we commit to sharing information about community responses to varied implementations.

We encourage other journals to join us in this initiative. We hope that our action inspires the community, including researchers, research funders, and research institutions, to recognize the benefits of published peer review reports for all parts of the research system.

REVIEW

REVISED Current trends in the treatment of pneumonia due to multidrug-resistant Gram-negative bacteria [version 2; referees: 2 approved]

Richard R. Watkins^{1,2}, David Van Duin³

[Author details](#)

Abstract

Pneumonia is one of the most common infections worldwide. Morbidity, mortality, and healthcare costs increase substantially when pneumonia is caused by multidrug-resistant Gram-negative bacteria (MDR-GNB). The ongoing spread of antimicrobial resistance has made treating MDR-GNB pneumonia increasingly difficult. Fortunately, there have been some recent additions to our antibiotic armamentarium in the US and Europe for MDR-GNB, along with several agents that are in advanced stages of development. In this article, we review the risk factors for and current management of MDR-GNB pneumonia as well as novel agents with activity against these important and challenging pathogens.

Open Peer Review

Referee Status:

Version(s)	Invited Referees	
	1	2
REVISED Version 2 published 06 Feb 2019		
Version 1 published 30 Jan 2019		

F1000 Faculty Reviews are commissioned from members of the prestigious F1000 Faculty. In order to make these reviews as comprehensive and accessible as possible, peer review takes place before publication; the referees are listed below, but their reports are not formally published.

- 1 **Frank Schweizer**, University of Manitoba, Canada
- 2 **Dean Winslow**, Stanford University School of Medicine, USA

研究成果發表的新趨勢

Wellcome Trust 2020 新政策

- 資助的研究必須在發表時同步開放於 PMC 和 Europe PMC
- 資助的研究必須以 CC-BY 條件發表
- 不再資助 hybrid OA 發表模式
- 在有明顯且重要的公共健康利益(預發)時，要求研究成果應以不經同儕審查的preprint 或 CC-BY 開放模式
- 資助的研究機構必須簽署 San Francisco Declaration on Research Assessment

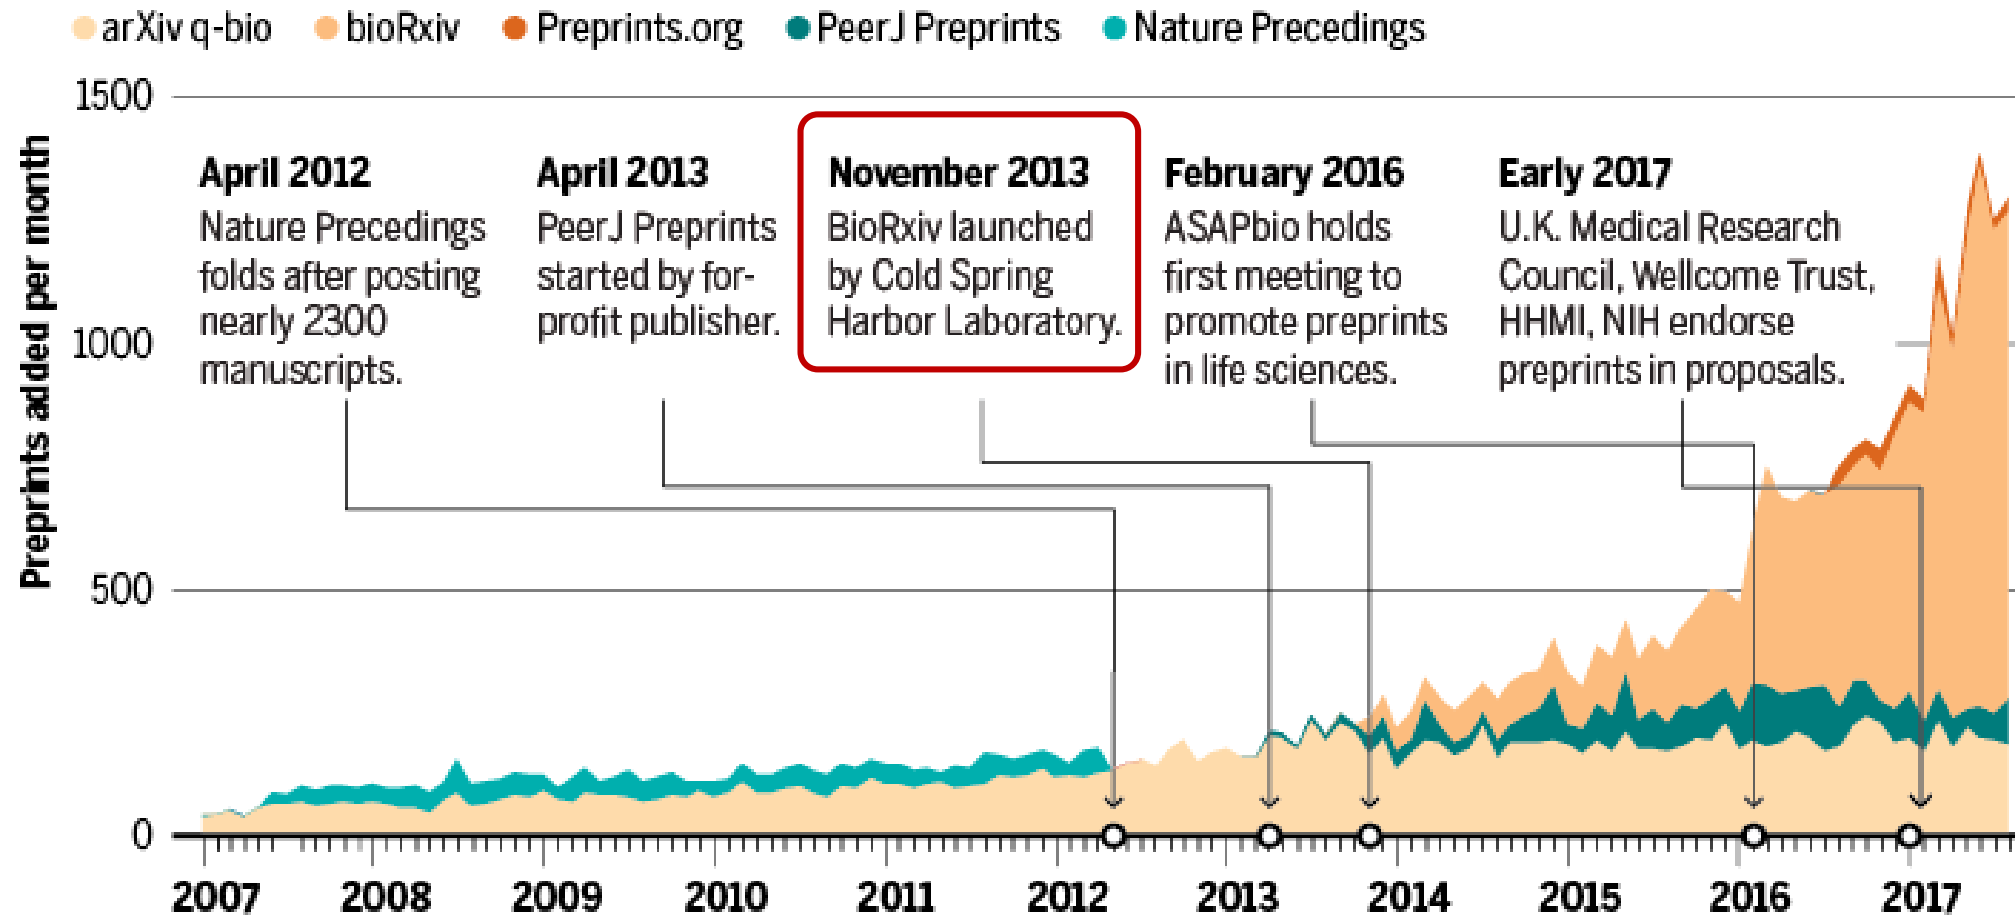

Declaration on Research Assessment

2012年DORA對資助機構、研究機構、出版社及研究人員提出建議:

- 期刊影響因子不應用來聘用、升遷、或資助研究人員
- 研究的價值來自於研究本身而非期刊
- 利用新科技來促進學術傳播交流及有效評估研究的影響

Preprint Publication

Preprint Server

THE PREPRINT SERVER FOR BIOLOGY

Search

Advanced Search

PLoS系統期刊已於2018年
新增preprint連結

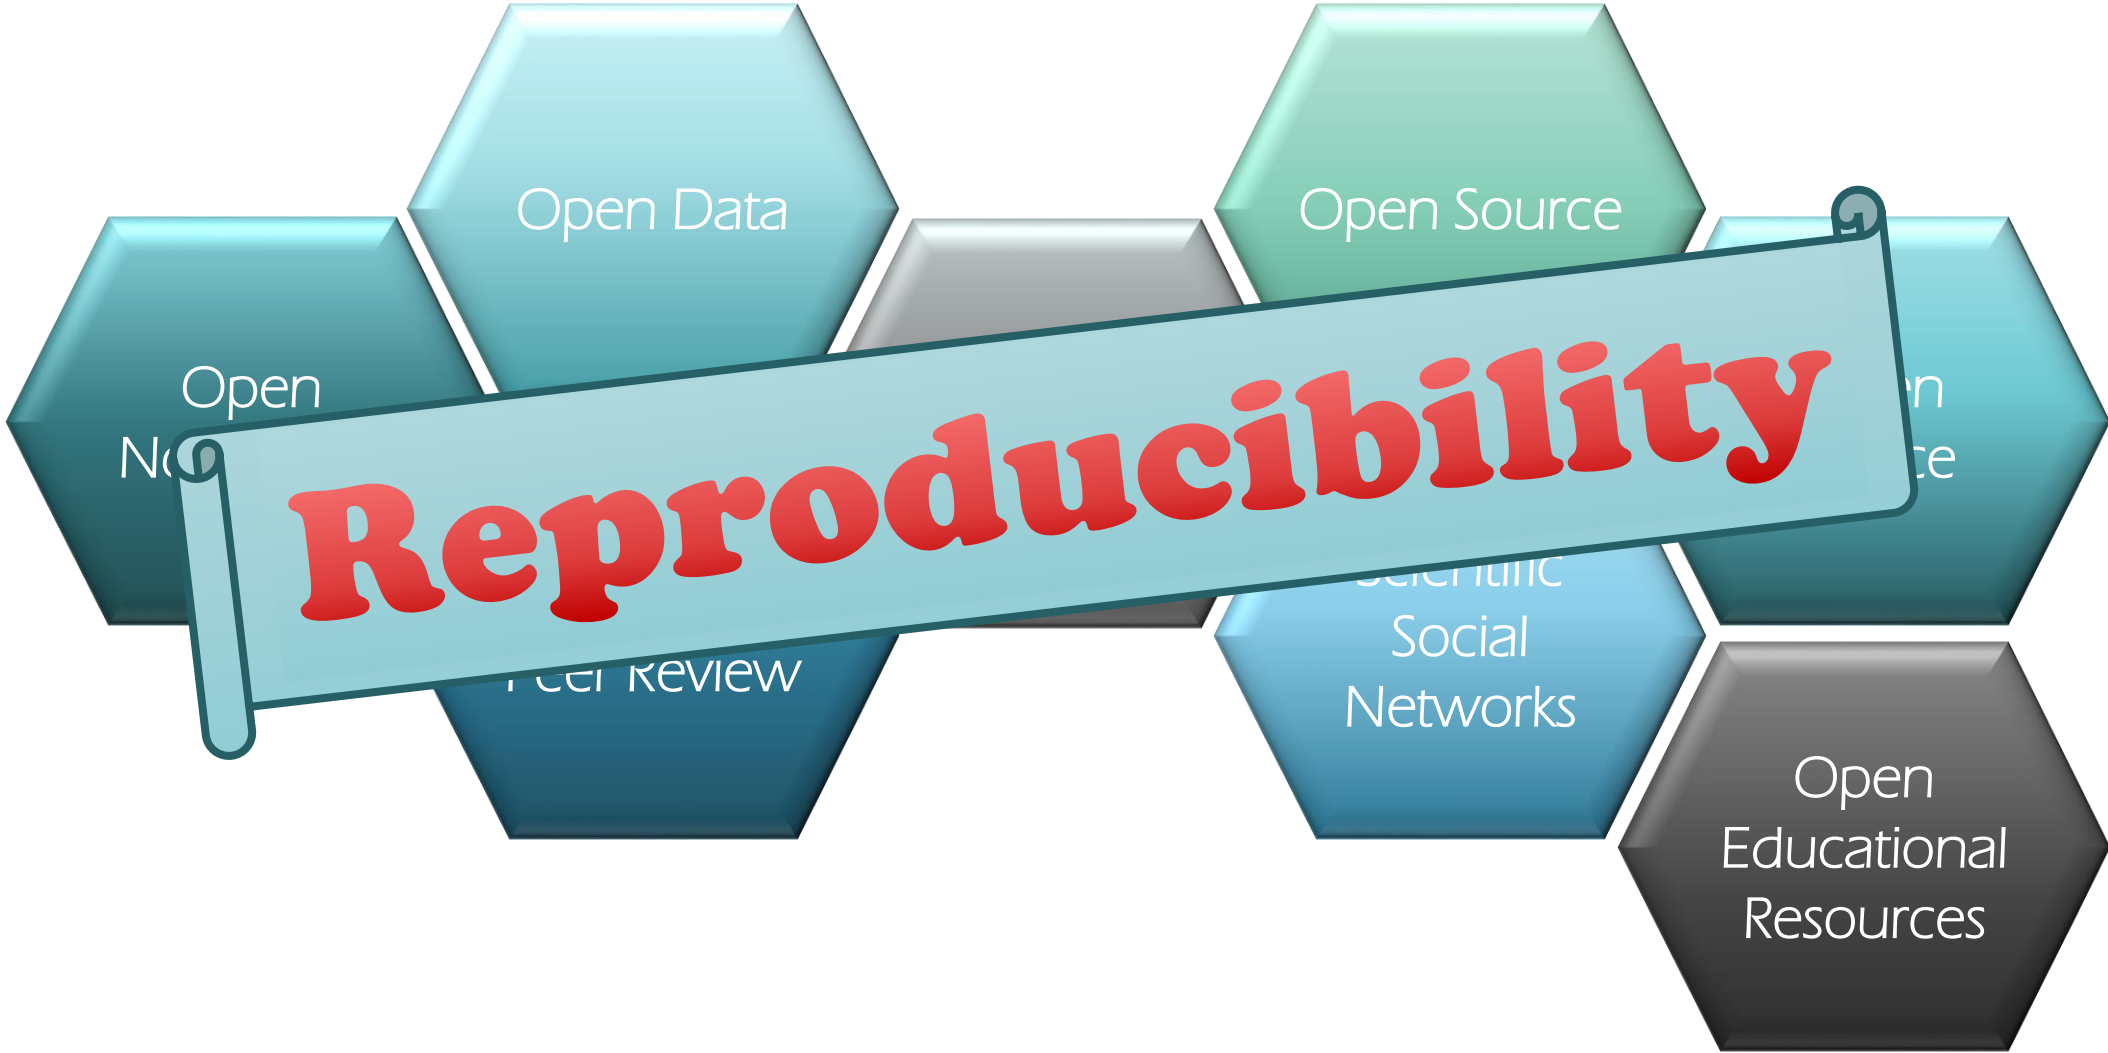

優點

- 資訊快速分享
- 免費刊登
- 快速刊登
- 不須經過同儕審查 (“screened”)
- 可直接轉至某些期刊投稿
- 可在之後發表的期刊網站加列連結
- 具永久性 (“withdrawn”但不能移除)

缺點

- 沒有impact factor，未列於主要資料庫
- 不適合刊登reviews or protocols
- 一般不接受臨床研究，除了流行病學和某些臨床試驗結果
- 有被其他人搶先發表的危險(?)
- 未經審查的資料可能造成讀者時間的浪費
